Ohio's 2020 Metropolitan and Micropolitan Statistical Area Delineationsⁱ

Ohio's revised delineations reflect the 2020 *Standards for Delineating Core Based Statistical Areas* (CBSAs) that the Office of Management and Budget (OMB) published on July 16, 2021, in the *Federal Register* Notice (86 FR 37770 - 37778).

The purpose of the Metropolitan and Micropolitan Statistical Area standards is to provide nationally consistent delineations for collecting, tabulating, and publishing Federal statistics for a set of geographic areas.

The Local Area Unemployment Statistics and Current Employment Statistics Programs will begin using the new delineations with the release of January 2025 data.

- ❖ **Metropolitan Statistical Area** - A Core Based Statistical Area (CBSA) that has at least one urbanized area with a population of 50,000 or more, plus adjacent territory that has a high degree of social and economic integration with the core as measured by commuting ties.
- ❖ **Micropolitan Statistical Area** - A CBSA that has at least one urban cluster with a population of at least 10,000, but less than 50,000, plus adjacent territory that has a high degree of social and economic integration with the core as measured by commuting ties.
